Mrigyanshi Digari

LinkedIn: linkedin.com/in/mrigyanshi/
GitHub: github.com/mrigyanshii
Email: mriigyanshii@gmail.com
Mobile: +91-9058065944

Skills

Languages: C++, JavaScript, C, Java, Python
Frameworks: HTML and CSS, Bootstrap, Tensorflow, Pytorch
Machine Learning & AI: Scikit-learn, Pandas, NumPy, TensorFlow, Natural Language Processing
Tools/Platforms: Git & GitHub, Figma, Docker, Github actions, FastAPI
Skills: Problem Solving, Team Player, Adaptability, Creative Thinking, Time Management

Projects

Multilingual Intent Discovery using NLP | GitHub: Dec' 25

- Engineered a multilingual NLP pipeline to automatically discover user intents from large-scale natural language queries without supervised labels.
- Processed ~842K queries from the MASSIVE dataset spanning 50+ languages, generating cross-lingual semantic embeddings using paraphrase-multilingual-MiniLM-L12-v2.
- Applied unsupervised clustering to uncover latent intent groups and enable semantic intent prediction for new queries via similarity matching.

Tech Stack: Python, Pandas, NumPy, Scikit-Learn, Sentence Transformers, Jupyter Notebook

Multi-Agent Bug Workflow Automator| GitHub: Oct' 25

- Developed an unsupervised ML system to analyze Jira bug reports and automatically group similar issues for workflow automation and intelligent task routing.
- Built a hybrid feature pipeline combining structured signals (comments, changelog events, votes, issue links, resolution time) with TF-IDF representations of bug descriptions.
- Implemented dimensionality reduction using TruncatedSVD and applied multiple clustering algorithms (K-Means, DBSCAN, Hierarchical) to identify recurring bug patterns.
- Designed a scalable agent-based workflow layer that maps discovered bug clusters to developer skill sets and difficulty levels, enabling automated assignment and future expansion to full project workflow orchestration.

Tech Stack: Python, Pandas, NumPy, Scikit-Learn, SciPy, Matplotlib, Joblib, Jupyter Notebook

PathMatch – ML – Based Career Guidance System| GitHub: May' 25

- Created a machine learning system that suggests career paths based on skills, interests, and performance indicators.
- Developed a supervised learning pipeline that predicts suitable career paths from student skill and interest profiles.
- Designed for high-school and college students exploring career direction (target audience).

Tech Stack: Python, Pandas, NumPy, Scikit-Learn, SciPy, Jupyter Notebook

Certificates

- Mastering C++: From Object Oriented Programming to Dynamic Programming | LPU | Certificate — Jul' 25
- Mastering Data Structures and Algorithms using C and C++ | Udemy | Certificate — Jan' 24

Extra Curriculars

- **Published Author – Autumn Diaries**
  Authored and published an original piece on Amazon, in a curated anthology, reflecting creative depth, thematic coherence, and literary articulation.

Education

- **Lovely Professional University** — Punjab, India
  Bachelor of Technology - Computer Science and Engineering; CGPA: 6.00 — Aug' 23 - Present
- **New Beersheba Senior Secondary School** — Pithoragarh, Uttarakhand
  Intermediate; Percentage: 69 — Apr' 21 – May 22
- **M Squire Public School** — Pithoragarh, Uttarakhand
  Matriculation; Percentage: 94 — Apr' 19 – May 20
